

Milkline Blue

Product codes & Pack size: BIO011 (1 litre)

Where to use: Alkali formula to clean fresh milk and sanitiser milk lines on automatic machines. Product will be used as part of the automatic cleaning cycle on the machine and will mix chemical with water in either the milk container or a jug, it will then flush through and clean the milk from the milklines. **Please note!** If the machines cleaning cycle first flushes the fresh milk from the milkline prior to cleaning then you need to recommend our alternative acid base cleaning solution BIO011B.

Key Benefits v Competition

- Formulation developed with leading coffee machine suppliers & users. Original formula developed with café bar for their shearer machines.
- Fast acting, alkali solution removes stale milk and sanitises milklines
- Prevents bacteria build up
- Independently tested to current hygiene standard EN13727.
- Easy to use dosing bottle.
- Developed with leading coffee professionals.
- Regular cleaning helps maintain beverage quality, prolongs machine life and can reduce maintenance costs
- UK design, manufacture and supply for over 15 years.

Usage/Dilution rates:

- Light duty 25ml per litre of water
